Relevance of history

Why did most white people think themselves superior because of their skin color?

How is society different today than from the early 60's in regards to racism?

Is racism completely gone from American culture?

Is racism in America confined to black and white, or does it involve other races- such as Hispanics, Asians, Middle-Easterners, etc?

Have you ever experienced racism?

Is there such a thing as white guilt? (For the white people: have you ever experienced this?)

What other movement gained a lot of momentum right after the Civil Rights Movement?

What is prejudice? Are there different kinds of prejudice? (Eg- Social class/ wealth, Gender, Religious, Race, etc)

Where does prejudice come from?

Is prejudice something that is innately inside of us from birth, or is it something learned (from our parents, from our societies, cultures, surroundings)?

How can you tell if you have prejudiced attitudes yourself?

Once you are aware of a prejudice you might have, how do you work to overcome it and go about educating yourself?

How can you help build unity in your community?

Can *youth* move the *world*? How is the Civil Rights Movement an example of this?
